

OPERATIONAL ORDER

CONTROL & CONTAINMENT OF VERMIN IN RESIDENT CLOTHING AND BEDDING – TITLE XV 1484

Purpose and Scope

When notified by Medical Staff of a resident being infected with vermin, ecto-parasites or disease necessitating a separate washing procedure for clothing and bedding, staff are instructed to follow this directive.

Affected Personnel

All Sworn Personnel - YDF

Authority

Title XV 1484

Effective Date

9/1/2019

I. Guidelines:

- A. Place all clothing and bedding in water-soluble bags, separating colored items from whites, the top closed by knotting it. Place the water-soluble bags in red plastic marked bags, identifying the reason for contamination.
- B. Deliver the bag to the laundry and notify the laundry staff. If the laundry staff is not there, place the contamination bag in the locked Laundry Room.
- C. Laundry personnel are directed to wash contaminated laundry as soon as possible to insure containment of the problem.
- D. Issue clean clothing and bedding after Medical Staff has provided care for decontamination.
